

ADSL2/2+

Dual ADSL2+ Bonded | 4 Ethernet Port WiFi | USB Host & Device

NexusLink 5631 Bonded Router

The NexusLink 5631 Wireless ADSL2+ Bonded Router is a black box solution for triple play applications. It features dual ADSL2+ bonded ports that provide twice the bandwidth (48Mbps) over comparable single-port models. It is also equipped with four Fast Ethernet ports, two USB ports and an 802.11b/g WLAN Access Point (AP). It goes above and beyond with high level features such as QoS, VPN and remote management (with TR-069 support).

FEATURES

Bonded ADSL2+ and Wired/Wireless LAN

Dual ADSL2/2+ bonded ports carry WAN traffic at speeds of up to 48 Mbps, while its Ethernet and USB ports support LAN traffic at 100 Mbps speeds. An integrated 802.11b/g WLAN Access Point (AP) provides wireless coverage at 54 Mbps speed. The TR-068 compliant rear panel and LED indicators also simplify installation and improve ease-of-use. Additionally, the USB host port connects to printers.

Safe & Secure Connections

First, both a Stateful Firewall (with DoS protection) and NAT/PAT protect the LAN from external threats. Second, IP and MAC address filtering provide fine-grained access control to or from the network. Third, Virtual Private Networks (VPN) with pass-through IPsec and WPA/WPA2/802.1x/WEP guarantee rock-solid security for wired and wireless connections.

Quality Of Service

Classify, control, and prioritize diverse traffic types, for pristine video, toll-quality voice, and error-free data transmissions.

Remote Management (TR-069 ACS)

TR-069/TR-098/TR-111 standards compatibility ensures interoperability with central office remote management equipment. From the user perspective this reduces downtime and frustration. For the service provider it means improved customer relations and cost savings. Other management options include telnet, ssh and a web user interface with advanced functionality.
